PROFFESIONAL SUMMARY

A dynamic professional with **3** years of IT experience in Mobile App Development Using **Flutter and Dart** and **1** year of experience in **Oracle PLSQL**.

- Good Experience on Flutter ,Dart ,Firebase , NodeJs.
- Having knowledge of Writing Stored Procedures ,ETL process in Oracle PLSQL.
- Hands on technologies like Android, iOS, Web using Flutter.
- Knowledge of OOPS Concepts.
- Good experience on customization of the screens and native controls for Android, iOS, Web using Flutter.
- Good Experience with powerful state management techniques like PROVIDER and BLOC.
- Having good knowledge on Web services consumption like Restful APIS.
- Having good knowledge with Database tools like Firebase, SQLite, Oracle SQL.
- Worked on Agile methodology.
- Ability to debug and fix issues.
- Comfortable using native Google libraries in the SDK as well as third-party libraries tailored for mobile and Web development.

WORKING PROFILE

- Worked as a contractor in primus global for 3 months.Worked as **Flutter Developer from Jan 2022 to May 2025** in **TATA CONSULTANCY SERVICES**. Previously worked in ORACLE PLSQL projects from May 2021 to May 2022 in **TATA CONSULTANCY SERVICES**.

PROJECT PROFILE

Flutter and Dart Projects

PROJECT NAME: SBI YONO2.0 Requirements

PROJECT DESCRIPTION:

This Project is about fixing the changes those are suggested by clients and customers of already existing project of SBI YONO Using Flutter and Dart , MongoDb.

- Used models according to Figma to structure the data.
- Mainly focused on the security of the application by using standard encryption and token techniques.
- Used databases like SQLite, oracle dB, firebase, Hive to store and retrieve the data.
- Maintained good Flutter and Dart Packages to make the widgets and data Responsive throughout the App.
- Used standard state management techniques like Provider, Bloc to increase the efficiency of APP
- Updated the functionality according to the requirement.
- Maintained Clean code throughout the Application.
- Integrated Web Services.
- Actively Participating in regular status Meetings.

PROJECT NAME: GODAVARI CUTS

PROJECT DESCRIPTION:

This Project mainly focuses on displaying good quality raw material food items like Fish, Prawns, Seafood, countrychicken and mutton. Also to sell them and ship to the customers by validating their respective Zip code. If successful in validation the payment will be activated, And Can Schedule delivery in any dates that the user wants to. This application is available for both mobile and web. It is developed by using Flutter ,dart and Firebase.

- Good designing packages like google fonts ,themes and Flutter Packages were used to provide eye pleasing interface for the users.
- Used databases like SQLite, Firebase, Shared Preferences to manage the data in the database.
- As it also available on the web used good data responsive widgets to make it responsive and adaptive.
- Http and Dio are used for Networking.
- Used standard State Management techniques like Provider, Bloc to maintain a global state.
- Used firebase authentication methods to sign up and signing users.
- Used Wishlist, cart, search Engine functionalities to make it much better and user friendly.
- Used Push Notifications which is written in cloud functions to send notifications of our store regarding latest offers and other updates.
- Followed Agile methodology for this application.

PROJECT NAME:REVAMP OF CBD

CLIENT:CBD

PROJECT DESCRIPTION:

This project mainly focuses on modifying the existing UI and some of the functionality of commercial Bank of Dubai.

- According to the given figma requirement I need to develop the ui.
- Need to develop in Arabic and English.
- Used bloc for the state management technique and with clean architecture.

- Regularly participated in client meetings to update status of figma.
- Closely collaborated with sit and uat teams for bug resolution.

Oracle PLSQL Projects

PROJECT NAME: VEEDELE (Vodafone End to End Data Linking Engine)

PROJECT DESCRIPTION:

This project seeks to use current fixed enterprise provisioning, billing and inventory systems to provide a comprehensive view of all fixed enterprise data, to accurately capture the customer, service, orders, assets and asset life cycle details etc. and to automate manual activities and reports to ensure an end-to-end view of Enterprise Customer It's Service Inventory, Customer premise equipment and Vodafone physical / logical assets.

PROJECT NAME: OSN2

PROJECT DESCRIPTION:

OSN2 application stores and manages the fixed line customer details like CLI, customer name, address, line type, command, and few supporting attributes, which are required for 999 emergency service maintained by BT. OSN2 receives the data from all the Vodafone provisioning and fulfilment systems. In addition, Business users refer to this application for performing their BAU activities – monitoring the data sent to BT, transactions in OSN2, managing and resolving any data errors identified, registering a new customer number into system and other administrative functionalities.

SOFTWARE PROFICIENCY

Technologies	: Flutter , NodeJs
Languages	: Dart, Java
Database	: NoSQL databases, SQLite, OraclePLSQL,Firebase,MongoDb.
Version Control	: Git.
Storage	: GitHub.
Issue Tracking	: JIRA , Azure DashBoard.
IDE's	: Android Studio, VSCode, Oracle SQL Developer, Eclipse.

CERTIFICATIONS

- PCEP – Python Entry level Certification.
- PSM-1 Scrum Master Certification.
- Oracle PLSQL Certification.
- Flutter and Dart Certification.

ACADEMIC BACKGROUND

Year	Degree	Institution	Board/University	Specialization/Subjects	CGPA/%
